Django Assignment – Codeverse 2025

Digital Portfolio Development

Total Marks:- 30

This assignment is for **all students of Section A, B, and C**. Each student from every group in **Codeverse** is required to **develop their own personal portfolio website** using the skills and content covered during the **Django session**.

Development Guidelines:

I have already created the complete **portfolio project** with all required pages properly connected (like Home, About, Projects, Contact, etc.). Now it's your turn to complete the design by adding your personal information to each page.

Portfolio Project Instructions

Below is the folder structure of your **Django portfolio project**. You are required to complete your personal portfolio by **editing only the content pages** listed under the templates/ folder.

What You Need To Do:

1. **Do Not Edit base.html**
   - This file handles the **overall layout**, **navbar**, **footer**, and shared styles.
   - Changing this can break the design of all other pages.
2. **Edit the following HTML pages** with your **personal information** :
   - home.html – Add your name, intro, and profile image
   - about.html – Add your detailed bio
   - education.html – Mention your academic background
   - projects.html – List your projects with descriptions
   - certification.html – Include your certifications (if any)
   - skills.html – Add your technical and soft skills
   - services.html – Mention any services you offer (like freelancing, etc.)
   - blogs.html – Share your blog links (optional)
   - featured.html – CodeVerse_2025(Example- I was featured in the **CodeVerse program**, where I showcased my technical skills and creativity. Being recognized among the top contributors was a proud moment that boosted my confidence and motivation to keep learning and growing in the field of development.), Highlight achievements or top projects
   - contact.html – Add your contact details or form
3. **Resume Upload**
   - Place your resume PDF in the static/files/ folder (create if it doesn't exist).
   - Link it in your home or about page using Django static tag:

Submission Deadline:- 20th July 2025

Portfolio Evaluation Criteria (Total: 30 Marks)

Category	Marks	Description
Project Completion	5	All required pages are created and properly linked.
Personal Content & Details	5	Genuine and relevant personal information is added on each page.
Design & Graphics	10	Use of good color schemes, images, and modern layout (clean, user-friendly).
Featured Section	5	Clearly explains CodeVerse participation or other achievements.
Resume Integration	5	Resume is uploaded and download link works properly.

Special Instructions for Your Portfolio Project

1. **Use Your Own Picture(Store static/IMG folder for picture)**
   o Upload a clear, professional picture of yourself in the portfolio.
2. **For CodeVerse Section Image(Store static/IMG folder for picture)**
   o Use images related to the **CodeVerse event** from the official **SVYASA Instagram Page**.
   o Choose visuals where you were featured or that reflect the event authentically.
3. **For Other Images**
   o Use **online image resources** like:
     ▪ Unsplash.com
     ▪ Pexels.com
   o Avoid blurry or low-resolution images.
4. **Use Bootstrap for Code & Templates**
   o All HTML/CSS designs should use Bootstrap for responsive and clean UI.
   o Use buttons, cards, forms, and layout components from Bootstrap only.
5. **Do Not Use ChatGPT for Page Graphics**
   o You must **design your own UI** using Bootstrap and creativity.
   o Submitting graphics directly copied from AI tools like ChatGPT may result in **poor design and lower marks**.
